

# I Living Lab 14

"How might we use digital technologies to improve health literacy for the prevention of cardiovascular diseases?"

Highlights from an interdisciplinary, interprofessional and international Design Thinking Lab in the E3UDRES2 project

created with PowerPoint Icons

## On the agenda:

1

E3UDRES2 and the ILLs

3

Rapid run through ILL 14

2

Design Thinking for innovation

4

Learnings from the ILL

# E<sup>3</sup>UDRES<sup>2</sup>

*Engaged and Entrepreneurial  
European University as Driver for  
European Smart and Sustainable  
Regions*

1

initiative launched by the European Commission

2

European University Alliance (9 institutions)

3

"co-innovate, co-ideate, co-create"

4

*Hackathons, Bootcamps, 1 Living Labs (ILLs)*

# I Living Labs

1

*Learners:* students from different universities, fields etc.

2

*Educational Entrepreneurs (EE):* university staff for coaching

3

*Challenge Owner:* stakeholder with a certain "problem"

4

*5 phases of Design Thinking:* weekly input, but self-managed by learners!

# Design Thinking

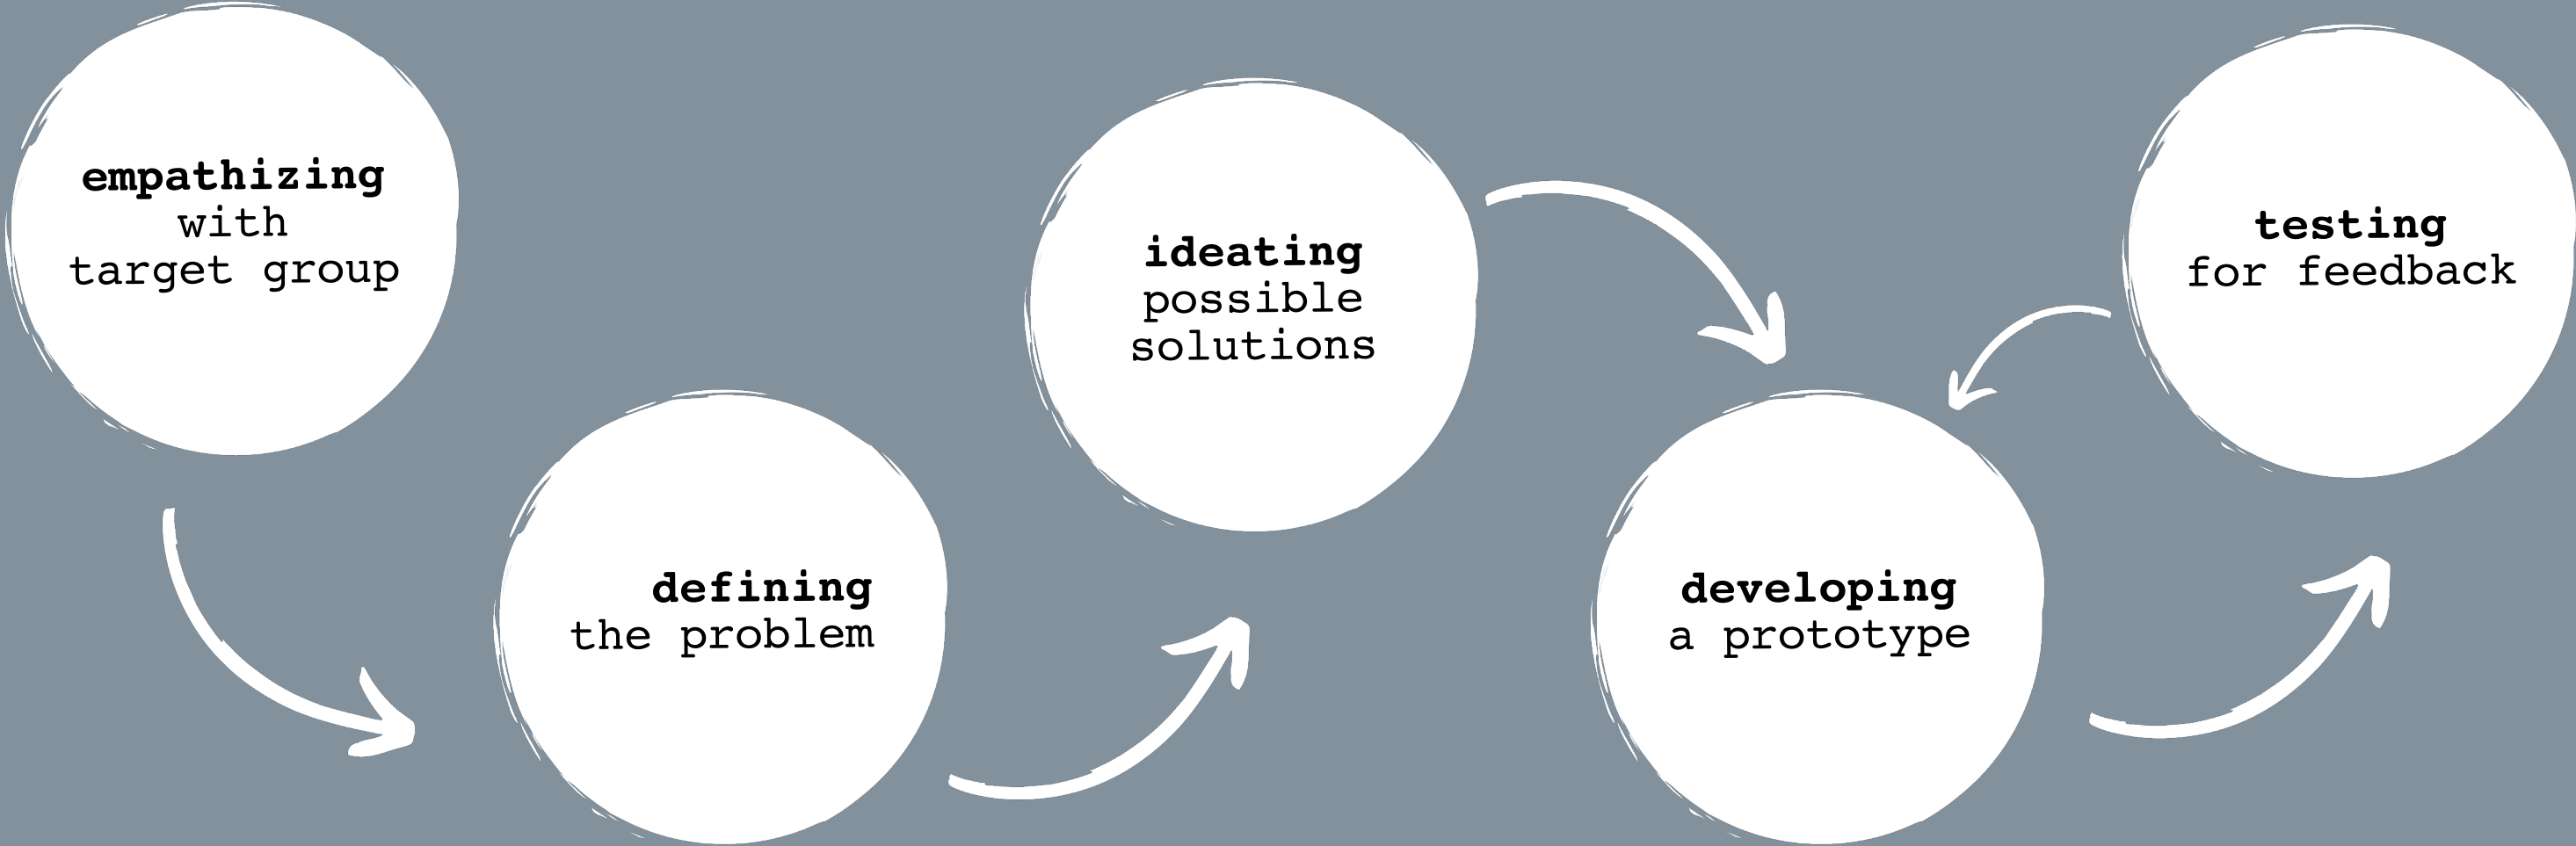

creative method for participatory design

focus on solutions

user-centered

iterative feedback and testing

5 phases:

# ILL 14

"How might we use digital technologies to improve health literacy for the prevention of cardiovascular diseases?"

1

**Cardiovascular diseases (CVD)** are Nr. 1 cause of death (*WHO, 2021*)

2

The majority of CVD **can be prevented** by leading a healthy lifestyle

3

**Low health literacy** is a threat to healthy decision making

4

**Digital technologies** might contribute to improving health literacy for CVD prevention

Challenge Owner:

# Rapid Run

## through ILL 14

1

Brainstorming,  
Six Thinking Hats etc.

2

coached sessions and  
unsupervised  
teamwork

**Empathizing with target group**  
= develop an understanding of the challenge

- Literature search
- Interviews with friends, family, colleagues etc.
- expert input

= gain basic knowledge on CVD  
= explore the understanding of CVD in society

**Defining the problem**  
= develop a problem statement

- lack of preventive knowledge/activity
- lack of reliable online information

= "How might we raise people's awareness concerning primary[1] prevention of CVD (risk factors, health checks, nutrition, exercise etc.) and empower them to make informed and healthy decisions?"

**Ideating possible solutions**

= creating ideas for possible solutions

- education to tackle low health literacy
- gamification to promote activity
- services to accompany the users

= brainstorm as many ideas as possible  
= break it down to one idea

**Developing a prototype**

= turning ideas into solutions

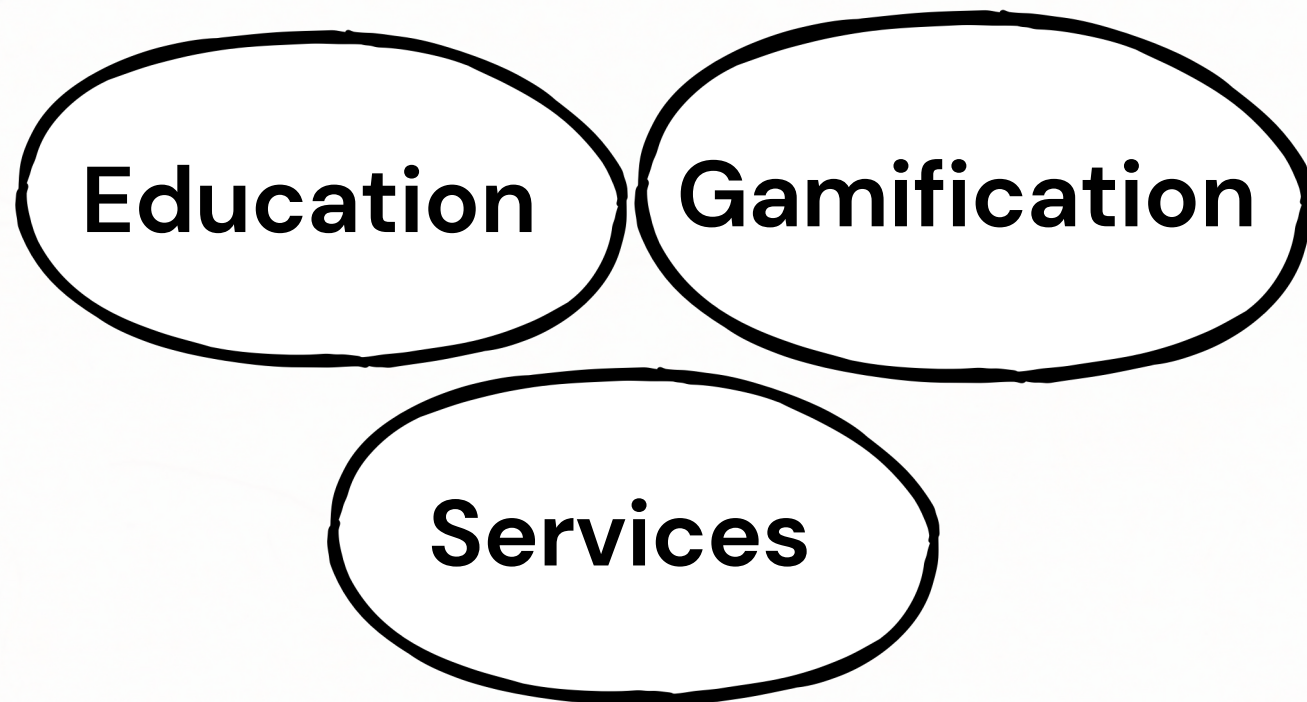

= reflect your idea from different perspectives (*Six Thinking Hats*)  
= develop a prototype

[1] In public health terms, primary prevention can be understood as measure to prevent the onset of disease or injuries before they even occur, e.g., through leading a healthy lifestyle (WHO)

# Prototype

## Cardio 365

Mural, poster and video:  
<https://tinyurl.com/u5dn5wr5>

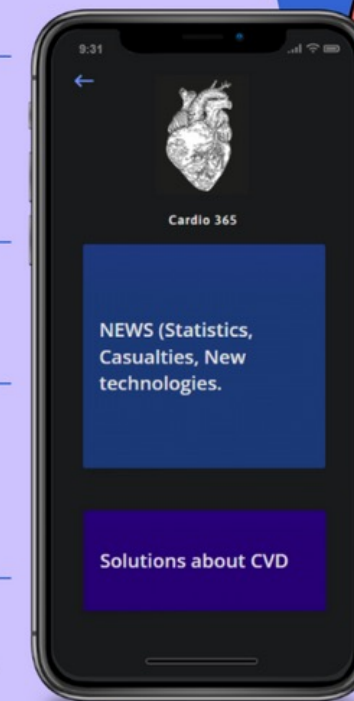

How might we use digital technologies to improve health literacy for the prevention of cardiovascular diseases?

### Team ILL 14

Sadun Muhammad  
Rodrigo Pinto  
Mariella Seel  
Judit Tormási

## Cardio 365

1. Ensuring a balanced and healthy life
2. Daily mobile application
3. Application that will help the user to have more balanced and nutritious food
4. News, daily solutions and tasks and gamification

**CVD is the #1 cause of death and with this app you can prevent it**

Cardio 365 is an app for primary prevention of Cardiovascular diseases that can promote advices and an healthy lifestyle for the user. The future of the app will be discussed with stakeholders in public healthcare.

#### Future Skills

- Collaboration, Coordination and Communication
- Literacy
- Creativity, Ideation, and Innovation

#### Design Thinking

It was a mix of all ideas that helped us to build the "framework" of the app

# Prototype Testing

Feedback session

- challenge owner
- EEs
- group of ILL 15 (digital technologies for elderly)

= collect feedback from peers and stakeholders  
= make final adjustments to the prototype

E3UDRES2 Showdown Event

Ready for your  
questions!
