based on a description from Andreas Jakl.
"a painting of a smart speaker in healthcare"*

Voice User Interfaces (VUI)

- Simple: question & answer-style
 - Get information, play song, set alarm
- True conversations
 - Remember the past!
 - Understand context
- → Conversational Design

Why Voice?

- Speed: Faster than typing
- Hands-free & available: e.g., doing exercises, cooking
- Intuitiveness: everyone knows how to talk
- Empathy: tone missing from written words
- Easier: Less mental & physical demand than typing

PRIVACY AND ETHICS

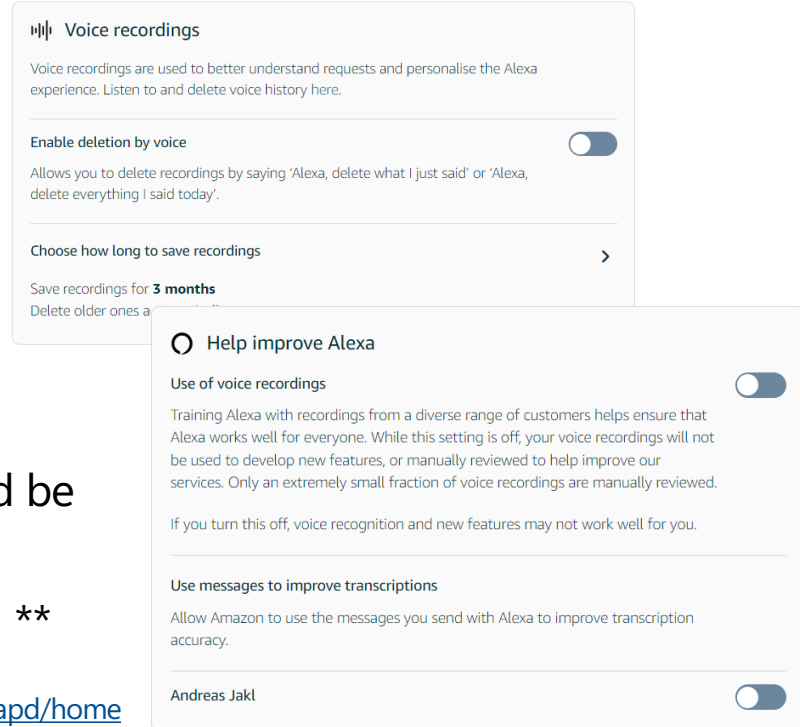

Platform Privacy

- Alexa always listens to wake word (“Alexa”)
 - Locally on-device
 - Thrown away if not detected
- Only records when trigger word recognized
 - Review & delete recognition history (in Alexa app or just say it)
- Privacy: choose if speech recognition should be improved based on your voice
- Future: more on-device voice recognition *, **

Manage Your Alexa Data

The more you use Alexa, the smarter the service gets by adapting to your speech patterns, vocabulary and personal preferences. Data from a diverse range of customers also helps ensure that Alexa works well for everyone.

Voice recordings

Voice recordings are used to better understand requests and personalise the Alexa experience. Listen to and delete voice history here.

Enable deletion by voice

Allows you to delete recordings by saying 'Alexa, delete what I just said' or 'Alexa, delete everything I said today'.

Choose how long to save recordings >

Save recordings for **3 months**

Delete older ones a

Help improve Alexa

Use of voice recordings

Training Alexa with recordings from a diverse range of customers helps ensure that Alexa works well for everyone. While this setting is off, your voice recordings will not be used to develop new features, or manually reviewed to help improve our services. Only an extremely small fraction of voice recordings are manually reviewed.

If you turn this off, voice recognition and new features may not work well for you.

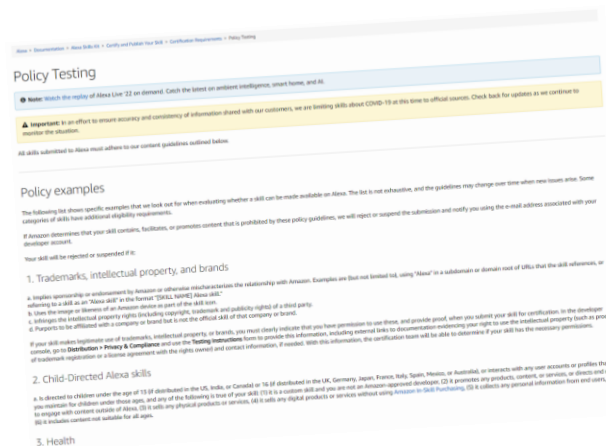

Use messages to improve transcriptions

Allow Amazon to use the messages you send with Alexa to improve transcription accuracy.

Andreas Jakl

Skill Guidelines

- Theoretically, you could ask the user everything and do what you like
 - But: that's not allowed!
 - Extra permissions required to access user data from their account
- Public Alexa Skill
 - Comply to certification requirements
 - Strict guidelines for data privacy & security
 - Additional rules for children and health information
 - Manual review
 - Can take a few days. Humans really test your skill and give you feedback.
 - Required privacy policy: you're a legal person and your service needs to comply with GDPR & co!
- Submission checklist: <https://developer.amazon.com/en-US/docs/alexa/custom-skills/certification-requirements-for-custom-skills.html>
